## TIOGA SERIES

Tioga series is a stile and rail design inspired by the Arts and Crafts movement that provides a classic library aesthetic. Tioga comes as a complete system to meet all the needs of any library's function.

## Management

**Committed to Continued Improvement.** In today's world economies, we understand the importance of creating a culture of change to embrace and implement Lean.

**Committed to the Environment.** The Northeast forest is the largest intact forest ecosystem east of the Mississippi that spans 30 million acres across Maine, New Hampshire, Vermont and New York. Its ecological significance is well-known with vast areas of wild forest, critical habitat and the headwaters of major rivers. But it is more than an ecological resource. It is also home to 2 million people whose cultures, livelihoods, families, aspirations and dreams are tied to the forest. Hale Mfg. Co. and our employees are proud to call this home. It is our intent to conduct all aspects of business, from the purchasing department to the finishing and packaging departments, in an environmentally responsible way to protect our planet for future generations.

## CRAFTSMANSHIP/QUALITY/LONGEVITY/COMPLEXITY/SIMPLICITY

At Hale, you'll find that we produce and finish things differently. Our true wood joinery is made to withstand years of service. There are no open joints, incorrect machining, added labor

expenses of assembly, or damages caused by assembly crews. We have the ability to reconfigure layouts on the spot, and add pieces to your environment at any time.

## Product & Options

The Tioga Series combines the warmth of sustainable North American hardwoods with high function and design flexibility. The crisp lines of stile and rail construction offer timeless, lasting sophistication to any space. The Tioga Series is immediately characterized by its fine-wood, made-in-America construction and is available with a broad range of top edge profiles, and crown and base moldings.

This series is designed to meet unique stile and rail specifications and can be supplied in genuine walnut, cherry, or birch in addition to our standard oak or maple offering. Panels feature genuine stile and rail construction with select grade hardwood veneer inset or raised panels. Solid lumber core is used where essential for strength and stability. Shelves are nominally 7/8" thick. Hardwood lumber of the same specie is used in components where durability is paramount.
